## (54) System for filtering data utilizing electronic watermark

(57) A filtering device (60) for connecting an internal network (10) with an external network (20) has a determination unit (62) for determining whether a data transfer is enabled or disabled. When data is transferred be-

tween the two networks (10, 20), the determination unit (62) determines whether or not the data transfer satisfies conditions defined by the contents of an electronic watermark (64) included in the data. The data transfer is enabled when it satisfies the conditions.

## **CLAIMS INCURRING FEES**

The present European patent application comprised at the time of filing more than ten claims.

- Only part of the claims have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims and for those claims for which claims fees have been paid, namely claim(s):

No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims.

## **LACK OF UNITY OF INVENTION**

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

see sheet B

- All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.

As all searchable claims could be searched without effort justifying an additional fee, the Search Division did not invite payment of any additional fee.

Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid, namely claims:

None of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims, namely claims:

Office

LACK OF UNITY OF INVENTION  
SHEET B

Application Number  
EP 99 30 6745

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. Claims: 1-6

conditional transfer of data between an internal network and an external network, comprising the step of determining whether the data transfer is enabled or disabled by examining whether the data transfer satisfies conditions defined by the contents of an electronic watermark included in the data.

2. Claims: 7-13

processing a transfer of data to an information processing device, comprising the steps of:  
executing a data transfer to an information processing device existing on a different network from a network on which said information processing device exists; and  
displaying in said information processing device that the transfer of the certain data has failed when certain data has not been transferred on the basis of particular information contained in the data.

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 99 30 6745

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.  
 The members are as contained in the European Patent Office EDP file on  
 The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
